

PURE AQUATIC PLUS

Pure Aquatic plus is a highly effective disinfectant for aquaculture.

It contains hydrogen peroxide and nanosilver, which greatly increase the disinfection efficiency. It is used when there are wounds on the body of the fish or parasites on the gills.

1. Antibacterial agent

Broad spectrum disinfectant for a wide range of bacterial pathogens

2. Anti parasitic agent

It reduces the presence of parasites in the rearing environment

3. provide good environment

It provides a healthy environment for the fish, thus making the fish in a good health condition

4. Highly effective

Effective under different conditions of temperature, salinity, oxygen and pH

5. No withdrawal period

Safe for all types of fish and crustaceans and has no residue harmful to consumers

➔ Dose:

- 1 liter / faddan for intensive system
- 1-2 Cm/m³

A large, dynamic splash of clear water forms a circular ring around the central text. The water droplets are captured in mid-air, creating a sense of movement and freshness. The background is a soft, light blue gradient.
